

W. BERNARD WHITE EDUCATION FOUNDATION

Meet the Class of 2017 Scholarship Recipients

This year 20 students were selected to receive \$500 each to use for Books and Supplies

"Thank you very much for the gracious and noble act of establishing and funding this scholarship. Your scholarship makes earning a degree possible for low-income students like me. My major is Computer Science and Computer Engineering. Over the next year, I am working towards getting my research published and developing a program that inspires and exposes high school students to research and computer science. I will continue to do my best to make you and the university proud."

George Michael Terrell II

"My major is Computer Science Game Development. This scholarship has really helped me stay at this school and learn much more. Thank you so much for giving me this opportunity. I will make sure to keep on going to exceed your expectations."

Gregory Johnson

"2017 Awardees" of the W. Bernard White Education Foundation

George Michael Terrell II, Gregory Johnson, Karl Woods, Walter L. Huggins II, James Bishop, LaKeysha L. Green, Francis Roby, Miah McConnell, Kayla Bowens, Jaylen Parker, Dwaine Evans, Joel E. Graves, Joshua Fountain, Darius Lewis, Bahkari Bridgewater, Jessica Stark, Emanuel Jones, David Harris, Kimisha Brown and Ghislain Mammo

"Thank you ever so much for contributing to the continuation of my education. As I have been the fortunate recipient of this Private Donor Scholarship for the 2017-18 academic year, this donation will help me to get where I truly belong."

Karl Woods

"I am a Computer Engineering plus hours professionally as a part-time student, and I work 40 hours a week. I am entering my 20th Year of service as a Detroit Police Officer. I am an enter-sworn officer coming this January 2018. The scholarship that you provided, allowed for additional assistance that I really need. It has been a challenging journey professionally and personally, in my efforts to transform myself from a public servant to a professional computer engineer. Which is why my gratitude is profound."

Walter L. Huggins II

Technology

"This scholarship has given me the opportunity to further my education because I was thinking before this, how will I pay for school and books? I don't think much of things, but when I see the things you have done and accomplished, I know I can do the same with some execution. Thank you for the motivation and this gift of a scholarship."

James Bishop

"I am a construction engineering management student. College can be very stressful on a student and expenses are a big part of it for most. With this opportunity, that you and LTU have provided me with, I will work to make a positive impact."

Francis Roby

"I am greatly appreciative of the gesture. It made my day. Over these few months, so much has discouraged me when it came to school. After all my hard work and sleepless nights, it seems like I am finally rewarded. Once again thank you for accompanying me on my journey to be an astounding mechanical engineer."

Miah McConnell

"I am an architecture and design student. It will be my first year in college and I'll be able to purchase the books I need for class. It won't go to waste I will take full advantage of this opportunity."

Kayla Bowens

"It is a great honor and an extreme privilege to receive the W. Bernard White Education Foundation Scholarship. Your Scholarship foundation made it possible for me to afford to purchase my textbooks at LTU. I truly thank you and I am proud that an alumni from Detroit who has walked more than a mile in the same shoes supports students who are struggling financially."

LaKeysha L. Green

"I want to personally thank you for your generosity in investing your financial services into my education. I plan on majoring in electrical engineering with 14 credits per semester thanks to your scholarship."

Jaylen Parker

"Because of your generous contribution, I have been able to focus more on academics rather than the cost of tuition and books."

Dwaine Evans

"The scholarship award is very much appreciated and will be used for financial assistance to help pay my tuition and text book expenses this year."

Joel E. Graves

"Because of kind and thoughtful individuals like you, I have been able to learn so much during my first year here at LTU. Without your generosity, I would not have been able to get this far in my engineering studies."

Joshua Fountain

"I had the pleasure of meeting you last year, and you were able to help me a lot last year. I received a 3.78 my Fall Semester, and a 3.52 in the Spring Semester. I would like to once again say thank you for your generous donation."

Darius Lewis

"First off; thank you! When I first started at LTU, there was no perceivable path to graduation. For the first time ever I look forward to purchasing my text books this fall."

Science

Bahkari Bridgewater

"I would like to personally thank you for helping me to further my educational conquest here at LTU. One of the more challenging aspects, in my recent years at LTU has been trying to figure out how to pay for each semester. I am very grateful for the scholarship opportunities you have provided for the student here."

Jessica Stark

"As a mechanical engineering student in my senior year, I have encountered a lot of struggles in the past. I understand that you, likewise, had certain challenges to conquer. Your testimony inspires me to strive for excellence regardless of certain boundaries in which I will come across in the near future."

Emanuel Jones

"It is because of the wonderful sacrificial giving of Lawrence Technological University alumnae, such as yourself, that has afforded me the opportunity to continue my studies at LTU this year. Life has surely challenged me financially to get to this classification, and being awarded this scholarship lets me know that I am on the right path with the additional fuel needed to continue."

Kimisha Brown

Mathematics

"I am a senior studying mechanical engineering at Lawrence Technological University. I work 30+ hours a week and this scholarship will reduce the stress of earning the money I need to pay for school. Your foundation has made financial sacrifices so that students like me can afford college and move forward in education."

David Harris

"I am originally from Cameroon (West Africa) I came to United States few years ago to pursue my education and become an engineer. I am a Biomedical Engineer (BME) and I will be graduating in May 2018: receiving this scholarship in my last year means a lot to me and I will forever be grateful to you and Lawrence Technical University."

Ghislain Mammo

Fund your future as an innovator in science, technology, engineering and mathematics.
